Food and Beverage Sales

The Board believes that food and beverages provided at school should promote healthy eating among students and teach positive eating behaviors that should be maintained throughout life. The Board further believes that proper nutrition will support students being ready to learn while at school. The superintendent or designee will develop procedures for implementation of this policy, which will include defined nutrition standards and portion size.

The procedures will be based on requirements specified in the United States Department of Agriculture (USDA) “Smart Snacks in School” standards for all foods sold in schools.

Note: This policy pertains to all food and beverages sold during the school day – midnight to 30 minutes after dismissal, (e.g. Child Nutrition Services, ASB, DECA, PTA, PTSA, booster clubs, etc).
